--PRESS RELEASE--

INTERNATIONAL HYDRO ACQUIRES SMALL HYDRO PLANT IN REMSE, GERMANY

Amsterdam, September 3, 2008

International Hydro BV announced that it has completed the purchase and financing of 100% of the small hydro plant on the river Zwickauer Mulde in Remse, in the State of Saxony in Germany. The plant has been in operation in its current setup since 2002.

Originally home to an 1865 paper mill, the site later became a leather factory and more recently a fruit juice bottler. In 2002 the existing site was fitted with an extra Kaplan turbine and has been producing an increasing amount of hydro power ever since.

International Hydro will further optimise the plant in Q3 and herewith increase the Kwh produced even further.

About International Hydro

International Hydro is an Amsterdam based company which is built on the idea that there is *nothing greener than blue*. We build, develop and finance our own portfolio of small hydro power plants in Europe. We are a sleek and entrepreneurial company looking to develop a cleaner, more reliable, sustainable and de-centralised energy source.

International Hydro has offices in Amsterdam, The Netherlands and Adenau, Germany.
